Good Practice Policy

DENTON POLICIES

DENTON

Good Practice

DENTON's 'Good Practice' environmental standards are a set of internal standards and procedures that we apply to our projects to benefit our clients.

ESG POLICY

[Click here to read our full ESG policy](#)

to learn about our strategy for working towards a better future and our ESG targets in 2024.

NET ZERO

As part of this bigger plan, DENTON Associates (London) Ltd has committed to halving its Green House Gases (GHG) Scope 1 and Scope 2 CO₂e emissions by 2030, targeting Scope 1, 2 and 3 Net Zero emissions by 2050. Planning, and committing to reduce our current GHG emissions levels, aligns with the UK Government plans and DENTON's core values of operating as a "responsible business."

WASTE MANAGEMENT

We responsibly manage our projects waste from cradle to grave, via our qualified supply chain. This includes the collection, transportation, disposal/recycling and monitoring of waste materials produced as a result of DENTON's operational activities.

SUPPLY CHAIN MANAGEMENT

We work closely with our largest contractors to adopt and implement our good practise standards.

BUILDING REGULATION COMPLIANCE

These standards apply to all projects, as a minimum. We work closely with our Approved Building Inspectors to ensure we comply with statutory criteria.

ENVIRONMENTAL PRODUCT DECLARATION

Encourage clients to adopt and implement materials with 'Environmental Product Declaration' (EPD) operational activities.

LOCAL MANUFACTURERS

Encourage clients to work with local manufacturers and installers.

MONITOR ENERGY USE

Each of our projects is monitored and recorded monthly for water and electricity use.

ISO 14001 ENVIRONMENTAL STANDARDS

This policy is the cornerstone of our environmental policy. We have been ISO accredited for 10 years. Our policy is carefully aligned and regularly monitored for compliance.

COMMITMENT TO TRAINING

DENTON has implemented a comprehensive ongoing training programme in ESG-related topics.

ENVIRONMENTAL STANDARDS

Encourage clients to adopt and implement RICS SKA-certified Environmental standards committed to control it and reduce its associated CO₂e emissions.
